**Re: St. Louis Altenheim – Project #5208**

Dear Mr. Krodinger:

This is to express my complete support for St. Louis Altenheim's request for a Certificate of Need to convert some of its existing independent living units to 30 assisted living beds.

St. Louis Altenheim has served its south City community for over 100 years. It is located in the Carondelet neighborhood, one of the oldest in the City, and it serves the residents in the surrounding community. Like elsewhere, the City's population is aging and dementia care is becoming an ever growing need. St. Louis Altenheim's proposal for 30 assisted living beds with memory care at an affordable cost is exactly what is needed in that part of the City. It will also enable St. Louis Altenheim to care for its existing independent living residents as their health care needs increase so they can age in place.

I hope you will approve this much needed project. Please do not hesitate to contact my office with any questions or concerns.

Sincerely,

A handwritten signature in cursive script that reads "Jacob Hummel".

**Re: St. Louis Altenheim – Project #5208**

Dear Mr. Krodinger:

This is to express my complete support for The St. Louis Altenheim's request for a Certificate of Need to convert some of its existing independent living units to 30 assisted living beds.

As an owner and operator of a Missouri licensed assisted living community serving adults with Mental Illness or Mental Retardation, I support that the certificate of needs analysis should exclude communities providing care for MI/MRDD. Residents of our community require a psychiatric diagnosis for admission and are generally a younger all male population. Alzheimer's disease is an irreversible, progressive brain disorder that slowly destroys memory and thinking skills, and eventually the ability to carry out the simplest tasks. The services and care that we provide would not be appropriate for an older adult with a diagnosis of Alzheimer's Disease.

I hope that the committee will grant The St. Louis Altenheim licensure for thirty Assisted Living beds. I believe that the additional beds will help to serve older adults living within the surrounding community that are in need of quality services for their loved one living with Alzheimer's Disease.

Sincerely,

*Kendall Brune*

To: The Department of Health and Senior Services

Certificate of Need Committee

Ladies and Gentlemen:

My name is Patricia Murphy, in concern of my mom June Brown who lives at St Louis Altenheim. Been a resident since 8-31-2013, on the supportive care floor. My mother will be 86 yrs old and Dx with Alzheimers since 2007.

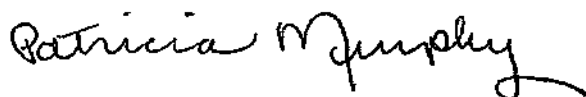

Upon her initial move she was in her own home, moved to a facility in which she was happy for the 1<sup>st</sup> year and then the facility changed the floor to a locked floor, not ready for that.

So we moved my mom into St Louis Altenheim November 2013, best move ever. My mom has been on the supportive floor since then. Since that time frame my mom's Dx has progressed. In which has diminished her daily living skills and ability to take care of herself on a daily basis. My mother is not ready or a candidate for the Nursing floor, in need of care in between.

St Louis Altenheim is petitioning in order to obtain an Assisted Living Memory Care Floor. This would be a wonderful addition, very much benefit St Louis Altenheim, residents, residents to come, staff of St Louis Altenheim. This type of floor would truly/ fully assist residents in need of this type of care for all the life stages.

Thank you for your time and consideration in advancing in the life of others.

Sincerely,

A handwritten signature in cursive script that reads "Patricia Murphy". The signature is written in dark ink and is positioned above the printed name.
